

Naan Mudhalvan  
Salesforce Developer(Course)  
Assignment

Name : George Anand A  
Naan Mudhalvan id : au620120104023  
Year & Dep : 4th year & IT  
Batch : 2024  
Zone no : Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Screenshot of the Salesforce Setup interface showing the creation of a new custom object named "College".

**New Custom Object**

Custom Object Definition Edit

**Custom Object Information**

The singular and plural labels are used in tabs, page layouts, and reports.

Label: College (Example: Account)  
Plural Label: Colleges (Example: Accounts)  
Starts with vowel sound:

The Object Name is used when referencing the object via the API.

Object Name: College (Example: Account)

Description:

Content-Sensitive Help Setting: Open the standard Salesforce.com Help & Training window (selected)

Content Name: None

**Enter Record Name Label and Format**

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: College Name (Example: Account Name)

Save | Save & New | Cancel

Screenshot of the Salesforce Setup interface showing the creation of a new custom object named "Department".

**New Custom Object**

Custom Object Definition Edit

**Custom Object Information**

The singular and plural labels are used in tabs, page layouts, and reports.

Label: Department (Example: Account)  
Plural Label: Departments (Example: Accounts)  
Starts with vowel sound:

The Object Name is used when referencing the object via the API.

Object Name: Department (Example: Account)

Description:

Content-Sensitive Help Setting: Open the standard Salesforce.com Help & Training window (selected)

Content Name: None

**Enter Record Name Label and Format**

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: Department Name (Example: Account Name)

**Object Manager** - Step 4 of 4

**Related List Label:** College

**Field Label:** Department  
**Data Type:** Master-Detail  
**Field Name:** Department  
**Description:**

Specify the title that the related list will have in all of the layouts associated with the parent.

**Related List Label:** College

Buttons: Previous, Save & New, Save, Cancel

Screenshot of the Salesforce Tabs setup page.

**Custom Tabs**

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Action	Label	Tab Style	Description

New | What Is This?

Screenshot of the Salesforce Object Manager - Department page.

The left sidebar shows navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area displays field types and their descriptions:

- Currency: Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
- Date: Allows users to enter a date or pick a date from a popup calendar.
- DateTime: Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the DateTime field.
- Email: Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
- Geolocation: Allows users to define location. Includes latitude and longitude components, and can be used to calculate distance.
- Number: Allows users to enter any number. Leading zeros are removed.
- Percent: Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
- Phone: Allows users to enter any phone number. Automatically formats it as a phone number.
- Picklist: Allows users to select a value from a list you define.
- Picklist (Multi-Select): Allows users to select multiple values from a list you define.
- Text: Allows users to enter any combination of letters and numbers.
- Text Area: Allows users to enter up to 255 characters on separate lines.
- Text Area (Long): Allows users to enter up to 131,072 characters on separate lines.
- Text Area (Rich): Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
- Text (Encrypted): Allows users to enter any combination of letters and numbers and store them in encrypted form.
- Time: Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50.600" are all valid times for this field.
- URL: Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

Buttons at the bottom right: Next, Cancel.

Screenshot of the Salesforce Object Manager - Department New Custom Field page.

The left sidebar shows navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area shows Step 2: Enter the details for a new custom field named "Dept\_mail".

Form fields:  
Field Label: Dept\_mail  
Field Name: Dept\_mail  
Description:  
Help Text:  
Required:  Always require a value in this field in order to save a record  
Unique:  Do not allow duplicate values  
External ID:  Set this field as the unique record identifier from an external system  
Auto add to custom report type:  Add this field to existing custom report types that contain this entity  
Default Value: Show Formula Editor  
Use formula syntax. Enclose text and picklist value names in double quotes. ('the\_text'), include numbers without quotes : [25], show percentages as decimal: [0.10], and express date calculations in the standard format: (today() + 7). To reference a field from a Custom Metadata type record use: \${CustomMetadata.Type\_\_mdt}RecordName.FieldName

Buttons at the top right: Step 2 of 4, Previous, Next, Cancel.

Screenshot of the Salesforce Object Manager page for the 'Department' object.

The left sidebar shows the 'Fields & Relationships' section selected. A list of field types is displayed with their descriptions:

- Currency
- Date
- DateTime
- Email
- Geolocation
- Number
- Percent
- Phone**
- Picklist
- Picklist (Multi-Select)
- Text
- Text Area
- Text Area (Long)
- Text Area (Rich)
- Text (Encrypted)
- Time
- URL

Each field type has a detailed description below it. At the bottom right of the page are 'Next' and 'Cancel' buttons.

Screenshot of the 'New Custom Field' setup page for the 'Department' object.

The left sidebar shows the 'Fields & Relationships' section selected. The main area is titled 'Step 2. Enter the details'.

Form fields include:

- Field Label:** Dept\_No.
- Field Name:** Dept\_No
- Description:** (empty text area)
- Help Text:** (empty text area)

Configuration options under 'Required' and 'Auto add to custom report type':

- Always require a value in this field in order to save a record
- Add this field to existing custom report types that contain this entity

Under 'Default Value':

- Show Formula Editor

A note at the bottom states: "Use formula syntax: Enclose text and picklist value API names in double quotes ('Dept\_No'). Include numbers without quotes ('123'), show percentages as decimals (.123), and express date calculations in the standard format ('Today') + 7]. To reference a field from a Custom Metadata type record use: \$CustomMetadata.Type\_\_mdt Records\$!Name Field\_\_c".

At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.

Screenshot of the Salesforce Setup interface showing the Object Manager for the 'Department' object.

The left sidebar shows navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area is titled 'Fields & Relationships' and lists 7 items, sorted by Field Label:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedBy	Lookup(User)		
Department Name	Name	Text(80)		✓
Dept_mail	Dept_mail__c	Email		▼
Dept_No.	Dept_No__c	Phone		▼
Last Modified By	LastModifiedBy	Lookup(User)		✓
Owner	OwnerId	Lookup(User,Group)		✓
Total_Count	Total_Count__c	Roll-Up Summary (COUNT College)		▼

Taskbar icons include: Home, Recent, 17.JPG, Department | Salesforce, linux, arun1, and system notifications.

Screenshot of the Salesforce Setup interface showing the 'Fields & Relationships' configuration for a custom field.

The left sidebar shows navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules.

The main content area is titled 'Data Type' and asks: 'Specify the type of information that the custom field will contain.'

The 'Data Type' section includes:

- None Selected: Select one of the data types below.
- Auto Number: A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
- Formula: A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
- Roll-Up Summary: A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
- Lookup Relationship: Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.
  - The relationship field is required on all detail records.
  - The ownership and sharing of a detail record are determined by the master record.
  - When a user deletes the master record, all detail records are deleted.
  - You can create rollup summary fields on the master record to summarize the detail records.
- Master-Detail Relationship: Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:
  - The relationship field is required on all detail records.
  - The ownership and sharing of a detail record are determined by the master record.
  - When a user deletes the master record, all detail records are deleted.
  - You can create rollup summary fields on the master record to summarize the detail records.
- External Lookup Relationship: Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Setup Home Object Manager

SETUP > OBJECT MANAGER College

Details Fields & Relationships Page Layouts Lightning Record Pages Buttons, Links, and Actions Compact Layouts Field Sets Object Limits Record Types Related Lookup Filters Search Layouts

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Checkbox Allows users to select a True (checked) or False (unchecked) value.

Currency Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Date Allows users to enter a date or pick a date from a popup calendar.

**Fields & Relationships**

- Lookup Relationship
- Master-Detail Relationship
- External Lookup Relationship

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Screenshot of the Salesforce Setup interface showing the creation of a new custom field.

The left sidebar shows the navigation path: SETUP > OBJECT MANAGER > Details.

The main content area is titled "New Custom Field".

**Step 2. Enter the details:**

- Field Label:** Mail
- Field Name:** Mail
- Description:** (Empty)
- Help Text:** (Empty)
- Required:**  Always require a value in this field in order to save a record
- Unique:**  Do not allow duplicate values
- External ID:**  Set this field as the unique record identifier from an external system
- Auto add to custom report type:**  Add this field to existing custom report types that contain this entity

**Default Value:** Show Formula Editor

Use formula editor. Enclose text and picklist value with names in double quotes. ('the\_text'), include numbers without quotes : (25), show percentages as decimal (.15), and express date calculations in the standard format: (Today() + 7). To reference a field from a Custom Metadata type record use: \${CustomMetadataType\_\_mdt} RecordName.FieldName\_\_c

Buttons at the top right: Previous, Next, Cancel.

Screenshot of the Salesforce Setup interface showing the addition of page layouts for a new custom field.

The left sidebar shows the navigation path: SETUP > OBJECT MANAGER > Details.

The main content area is titled "New Custom Field".

**Step 4. Add to page layouts:**

Field Label: Mail  
Data Type: Email  
Field Name: Mail  
Description: (Empty)

Select the page layouts that should include this field. The field will be added as the last field in the first 2-column section of these page layouts. The field will not appear on any pages if you do not select a layout.

To change the location of this field on the page, you will need to customize the page layout.

Add Field Page Layout Name  
 Details Layout

When finished, click Save & New to create more custom fields, or click Save if you are done.

Buttons at the top right: Previous, Save & New, Save, Cancel.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the DateTime field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define location. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, "10" and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Allows users to enter up to 255 characters on separate lines.

Allows users to enter up to 131,072 characters on separate lines.

Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.

Allows users to enter any combination of letters and numbers and store them in encrypted form.

Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50.600" are all valid times for this field.

Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

tabs

SETUP Tabs

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

Action	Label	Tab Style	Description
Edit   Del	Coffees	Building Block	
Edit   Del	Departments	Credit card	
Edit   Del	Details	Lightning	
Edit   Del	Favourites	Diamond	
Edit   Del	Efragance_products	Lightning	
Edit   Del	Inventories	CD/DVD	
Edit   Del	our customers	Bottle	
Edit   Del	Properties	Airplane	
Edit   Del	retailers	Highway Sign	
Edit   Del	Skincare_products	Star	
Edit   Del	Students	Triangle	

9.JPG arun2 NM assignment

Screenshot of the Salesforce Setup interface showing the Flows list.

The left sidebar shows the navigation menu under "Setup":

- Apps
  - Lightning Bolt
  - Flow Category
- Process Automation
  - Automation Home (Beta)
  - Flows
    - Migrate to Flow
    - Paused And Failed Flow
    - Interviews
  - Process Builder
- Workflow Actions
  - Email Alerts
  - Field Updates
  - Outbound Messages
  - Send Actions
  - Tasks
- Workflow Rules
- Environments
- Monitoring

The main content area displays the "Flows" list:

Flow Label	Process Type	Active	Temp...	Package Status	Pack...	Last Modif...	Last Modified Date
Basic Approval Request	Flow Orchestration for CMS	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Managed-Installed			
Book Appointment from Invitation	Salesforce Scheduler Flow	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Managed-Installed			
Cancel Item Flow	Screen Flow	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Managed-Installed

Create Process Exception Flow	Autolaunched Flow	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Managed-Installed			

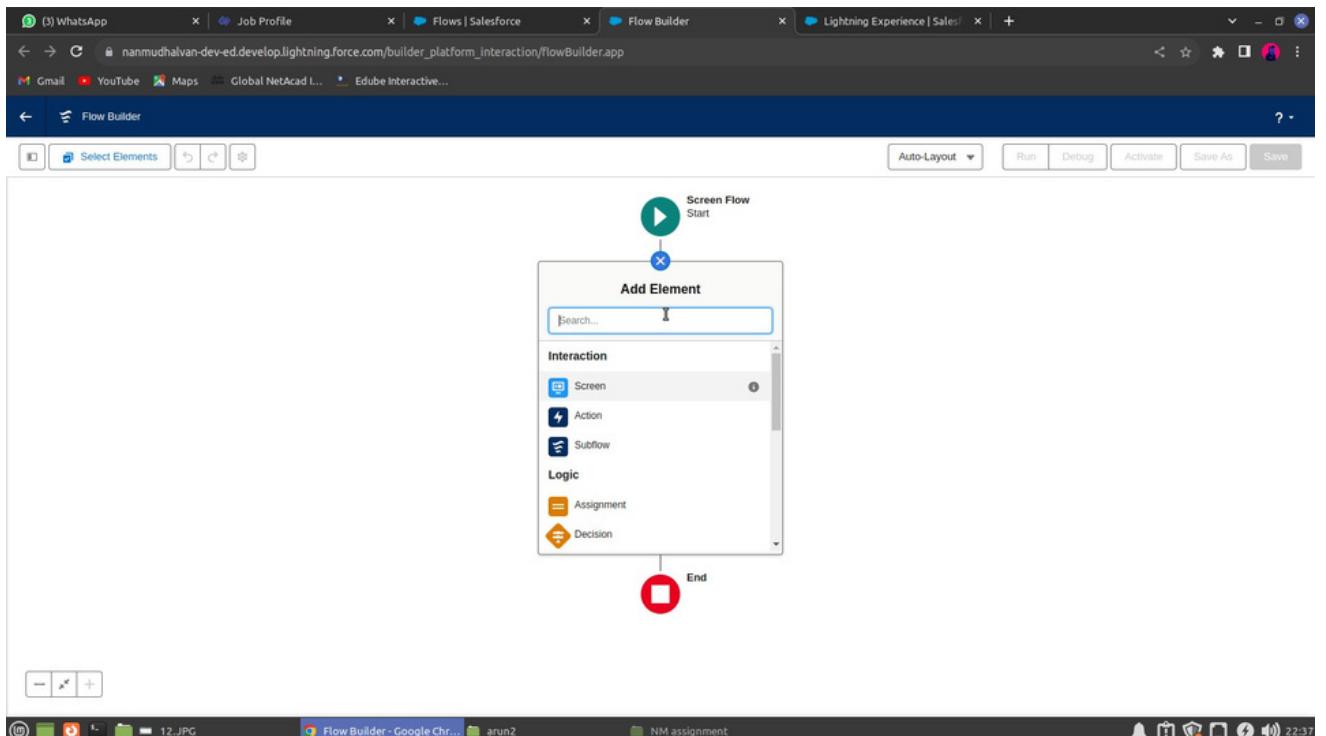

Screenshot of the Flow Builder interface showing the "New Flow" screen.

The left sidebar shows the "Elements" tab selected.

The main content area displays the "Core" section of the "All + Templates" list:

- Screen Flow
  - Guides users through a business process that's launched from Lightning pages, Experience Cloud sites, quick actions, and ...
- Record-Triggered Flow
  - Launches when a record is created, updated, or deleted. This autolaunched flow runs in the background.
- Schedule-Triggered Flow
  - Launches at a specified time and frequency for each record in a batch. This autolaunched flow runs in the background.
- Platform Event—Triggered Flow
  - Launches when a platform event message is received. This autolaunched flow runs in the background.
- Autolaunched Flow (No Trigger)
  - Launches when invoked by Apex, processes, REST API, and more. This autolaunched flow runs in the background.
- Record-Triggered Orchestration
  - Launches when a record is created or updated. An orchestration lets you create a multi-step, multi-user process.

At the bottom right of the list, there is a "Create" button.

[Next](#)

A screenshot of a custom Salesforce application interface. The top navigation bar includes a cloud icon, a search bar, and various icons. Below the bar, there are tabs for "College" and "Department", with "Details" currently selected. The main content area shows a contact record for "George". The contact details are: Name (George), Email (georgeanand555@gmail.com), Phone (1234567890), Date (18/10/2023), and Gender (Male). At the bottom of the contact card, it shows "Created By" and "Last Modified By" both listed as "George" on 18/10/2023, 3:42 pm.

3. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

The screenshot shows the Salesforce Lightning Experience interface. The top navigation bar includes tabs for WhatsApp, Job Profile, New Custom Object | Sales, and Lightning Experience | Sales. Below the navigation is a toolbar with links to Gmail, YouTube, Maps, Global NetAcad..., and Edube Interactive... A search bar labeled "Search Setup" is also present.

The main content area is titled "New Custom Object" under the "SETUP" tab. It displays the "Custom Object Definition Edit" form. The "Custom Object Information" section contains fields for "Label" (set to "Account") and "Plural Label" (set to "Accounts"). There is also a checkbox for "Starts with vowel sound". The "Object Name" field is set to "Account". The "Description" field is empty. Under "Context-Sensitive Help Setting", the radio button for "Open the standard Salesforce.com Help & Training window" is selected. The "Content Name" dropdown is set to "None". At the bottom, a note states: "The Record Name appears in new layouts, new lists, related lists, rollups, and search results. For example, the Record Name for Account is "Account Name" and the Case it is "Case Number". Note that the Record Name field is also called "Name" when referenced via the API."

The screenshot shows the Salesforce Tabs setup interface. The left sidebar is titled 'User Interface' and includes sections for 'Rename Tabs and Labels' and 'Tabs'. A search bar at the top right says 'Search Setup'. The main content area is titled 'Tabs' and shows a sub-section 'New Custom Object Tab'. It's Step 1 of 3. The first step asks to choose a custom object, with 'Management' selected from a dropdown. Other options include 'Create a new custom object now' and 'None'. Below this, there's a note about choosing a splash page custom link, which is currently set to 'None'. There's also a field for a short description, which is empty. At the bottom right are 'Next' and 'Cancel' buttons.

Screenshot of the Salesforce Setup interface showing the 'Tabs' page.

The page title is 'Tabs' under the 'Custom Object Tabs' section. It lists various tabs with their labels and styles:

Action	Label	Tab Style	Description
Edit   Del	Coffees	Building Block	
Edit   Del	Departments	Credit card	
Edit   Del	Details	Lightning	
Edit   Del	Favourites	Diamond	
Edit   Del	Fragrance_products	Lightning	
Edit   Del	Inventories	CD/DVD	
Edit   Del	Managements	Camera	
Edit   Del	our_customers	Bottle	
Edit   Del	Properties	Airplane	
Edit   Del	retailers	Highway Sign	
Edit   Del	Skincare_products	Star	
Edit   Del	Students	Triangle	

The 'Web Tabs' section shows: 'No Web Tabs have been defined.'

At the bottom, there are browser tabs for WhatsApp, Job Profile, Tabs | Salesforce, Lightning Experience | Sales..., and a search bar.

Screenshot of the Salesforce Lightning Experience interface showing the 'Management' tab.

The top navigation bar includes tabs for My-app, Recently Viewed, College, Department, Details, and Management.

The main content area displays a 'Recently Viewed' section for 'Management' with the message: '0 items • Updated a few seconds ago'.

Below this is a table with columns: Management Name, Last Modified, and Status.

Management Name	Last Modified	Status
Management	1 min ago	Active

At the bottom, a message states: 'You haven't viewed any Management recently. Try switching list views.'

This screenshot shows the 'Permission Sets' page in the Salesforce setup. The left sidebar includes links for Hyperforce Assistant, Lightning Experience Transition Assistant, and various user-related sections like Accounts and Salesforce Scheduler. The main content area displays a table of existing permission sets, each with a checkbox, a label, a description, and a license type. The table is paginated at the bottom.

The screenshot shows the 'Permission Sets' page in the Salesforce setup. A permission set named 'manager12' is selected. The 'Accounts' tab is active, showing object permissions for 'Account'. Under 'Object Permissions', 'Read', 'Create', 'Edit', and 'Delete' are checked, while 'View All' and 'Modify All' are unchecked. Under 'Field Permissions', 'Account Name' has 'Name' selected with both 'Read Access' and 'Edit Access' checked. Navigation links include 'Permission Set Overview', 'Object Settings', and 'Accounts'.

The screenshot shows the 'Select Users to Assign' page. The sidebar navigation is identical to the previous screen. The main area displays a list of users under the heading 'All Users'. One item is selected: 'manager 1' (Full Name: m1, Username: managerabc.abc@gmail.com). Other users listed include 'george' (Full Name: AJ, Username: arunj@123gmail.com), 'Chatter Expert' (Full Name: Chatter, Username: chatty.00d5j00000dq4hgeat.t3yy9pn6v4mm@chatter.s...), 'consumer 1' (Full Name: c1, Username: cons143@gmail.com), and 'Integration User' (Full Name: integ, Username: integration@00d5j00000dq4hgeat.com). The 'Role' column indicates 'System Administrator' for george, 'Chatter Free User' for Chatter Expert, 'Marketing Team' for consumer 1 and Integration User, and 'Manager' for manager 1. The 'Profile' column lists 'System Administrator', 'Chatter Free User', 'consumer', 'Analytics Cloud Integration Us...', and 'Manager' respectively. Buttons at the bottom include 'Cancel' and 'Next'.

The screenshot shows the 'Current Assignments' page for the 'MANAGER12' permission set. It displays a table with one row: 'manager 1' assigned to 'Marketing Team' with profile 'Manager', active status, and using 'Salesforce Platform' license. There are edit and delete icons in the table header and a 'Add Assignment' button at the top right. The background shows the Salesforce setup interface with a sidebar and various tabs.

4.Create a screen flow for a basic survey to fill in the details for any form.

Screenshot of the Salesforce Setup interface showing the "New Custom Object" page.

**Custom Object Definition Edit**

**Custom Object Information**

The singular and plural labels are used in tabs, page layouts, and reports.

**Label:** Bank (Example: Account)

**Plural Label:** Banks (Example: Accounts)

**Starts with vowel sound:**

The Object Name is used when referencing the object via the API.

**Object Name:** Bank (Example: Account)

**Description:**

**Content Name:**  (None)

**Contest-Sensitive Help Setting:**

- Open the standard Salesforce.com Help & Training window
- Open a window using a Visualforce page

**Enter Record Name Label and Format**

The Record Name appears in name facets, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Restriction Rules

Specify the type of information that the custom field will contain.

**Data Type**

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
